VIKTORIIA ZOLOTOVA

Auburn, WA | (253) 394-4003 | viktoriiazolotova@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY: Result-oriented software engineer with 1+ years of expertise in designing and implementing highly accessible scalable web applications, and Rest APIs using JavaScript, Python, and Postgres. A collaborative team member adept at thriving in diverse, fast-paced environments. Demonstrated success in delivering data-driven solutions that optimize workflow, resulting in tangible time savings of over 120 hours per year, which translated into cost savings of $5K annually and enabling potentially sales opportunities.

TECHNICAL SKILLS

- **Languages & Frameworks:** JavaScript, Node, Express, React, Redux, Python, Flask, Django, HTML, CSS
- **Tools & Technologies:** Git, Postman, Heroku, Docker, AWS S3, CI/CD, Material UI, Jira, Jest, Cypress, PostgreSQL, SQL, Ag React Charts, CloudFront.
- **Methodologies:** Agile, Test-Driven Development.

RELEVANT EXPERIENCE

Nordstrom - *Retail*   **Seattle, WA**
Software Engineer Intern, Product Publisher Team   **02/2023 - Present**

- Spearheaded the design and development of a highly scalable and user-friendly Product Lifecycle UI tool, transforming workflows for 100+ users. Designed wireframe and developed Rest APIs using Node and Express that seamlessly integrated with React and Redux, ensuring compliance with company standards.
- Created project documentation in Confluence, incorporating design decisions, wireframes, and task breakdowns in Jira for smooth feature development and timely delivery within a 5-month period.
- Developed a dashboard with 5 visual metrics and data grid for instant status updates, resulting in saving 3-6 developer hours per sprint, enabling timely problem-solving and increasing sales opportunity.
- Implemented a robust test plan, including 10 end-to-end test cases using Cypress, to enhance the user experience, minimize software bugs, and achieve comprehensive 87% coverage.
- Successfully presented the UI tool to a diverse audience of 40+ individuals, including leadership, effectively communicating problem statements, key features, and future enhancements.
- Deployed the application, utilizing CI/CD pipeline and AWS S3 and CloudFront cloud-based technologies.

Pet Care Exchange, Web App – [GitHub](#) | [Demo](#)   **Seattle, WA**
Creator and Developer   **01/2023-02/2023**

- Developed a user-friendly, accessible full-stack web application, leveraging modern cloud technologies such as Amazon Web Services S3 for storage and Google Firebase hosting, within a tight 3-week timeframe to facilitate the exchange of pet care services among pet owners in the community.
- Rapidly learned new technologies, including Python, Django, and PostgreSQL, to develop a highly scalable RESTful API and integrated it with the front end for efficient management of pet sitters.
- Dedicated to delivering the best user experience, enhanced the system with seamless city-based search integration and robust filtering, ensuring efficient and targeted pet sitter connections.

ADDITIONAL EXPERIENCE

Alaskan Copper and Brass Company - *Manufacturing*   **Kent, WA**
Payroll Specialist   **07/2017 - 08/2022**

- Processed payroll for 250+ employees across multiple states, ensuring timely and accurate payment on biweekly cycles while maintaining compliance with federal and state regulations.
- Contributed significantly to the successful and timely implementation of a new payroll system for 250 employees, including testing compliance with payroll regulations for 4 states and 6 unions. Achieved a 25% reduction in payroll processing time and improved accuracy in payroll calculations.

EDUCATION

Ada Developers Academy   **Seattle, WA**
Full Stack Web Development & Computer Science Fundamentals   **08/2022 - Present**

Sumy State University   **Sumy, Ukraine**
Diploma in Finance, Finance Specialization   **09/2006 - 06/2011**
